Greetings, friends!

The cycle of gardening never ceases to deliver hope, no matter where we are. Here in the Northern Hemisphere, our countertops are overflowing with ripe produce. We hope you'll be sharing your bounty with family and your community.

For our friends in the Southern Hemisphere, it's early spring and the sun is just now waking up their SFG beds. The hope and anticipation is part of the fun, with gardeners excited to try new veggies and maybe build that trellis or irrigation system this year.

If Fall is in your forecast, you'll enjoy the expert advice we’ve got below. If Spring is ahead of you, scroll down for a link to some prior Spring Quarterly newsletters. We’ve got you covered, no matter the season or where you grow (as long as it’s in an SFG🙂)

Happy Gardening!
