

# Plant spacing for a typical 4' x 4' Square Foot Garden

•Extra Large 1 per square\* •Large 4 per square •Medium 9 per square •Small 16 per square

North facing side for vertical crops

 <p>Tomato</p>	 <p>Cucumber*</p>	 <p>Melon*</p>	
 <p>Basil Small Variety</p>	 <p>MARIGOLD</p>	 <p>Eggplant</p>	 <p>Onions</p>
 <p>Lettuce</p>	 <p>Beets</p>	 <p>Carrots</p>	 <p>Beans - Bush Variety</p>
 <p>Cabbage</p>	 <p>Green Onions</p>	 <p>Spinach</p>	 <p>Radishes</p>

# Planning a Typical 4’ x 4’ Square Foot Garden

**Extra-large: 1 per square • Large: 4 per square • Medium: 9 per square • Small: 16 per square**

Anyone can be a successful gardener using the Square Foot Gardening method. When mapping your garden always use the North facing side of your bed to plant vertical crops. Use this blank template to sketch out what you’d like to grow. Remember that many vegetables ripen in a short enough time to allow you to replant a square a second or even a third time, depending on your growing season.
