

EQUAL PARTS BY VOLUME of JUST THREE NATURAL INGREDIENTS

# 1/3

## COARSE VERMICULITE

You may use extra coarse if regular coarse is not available.

**DO NOT USE medium grade vermiculite.**

If vermiculite is not available use instead 2/3 compost and 1/3 peat moss until coarse or extra coarse grade vermiculite becomes available.

# 1/3

## SPHAGNUM PEAT MOSS

Due to peat's high capacity to hold water, air and nutrients it is a key ingredient in Mel's Mix.

If you are unable to access Peat Moss, use 2/3 compost and 1/3 coarse grade vermiculite until peat moss becomes available.

# 1/3

## BLENDED ORGANIC COMPOST

Compost is essential for growing plants and a key part of Mel's Mix. It's the only ingredient needing replenishment after each harvest.

For best results, use 5 compost sources, none of these sources should exceed 20% of your total compost. Compost sources include: mushroom, worm castings, seafood, and forest products. Screen bagged compost for large chunks.
